EDUCATION

Wilfrid Laurier University
Bachelor's, Computer Science

September 2021 - April 2025
GPA: 3.9

PROFESSIONAL EXPERIENCE

Faura **June 2025 - March 2026**
Software Engineer *United States*

- Built backend services and APIs for a natural disaster risk assessment platform used by 10,000+ homeowners
- Designed and integrated external data pipelines (geospatial, property data) to generate real-time risk scores
- Improved system scalability and reliability by migrating core services to a more structured backend architecture

Clover Labs **March 2025 - June 2025**
Product Engineer *Canada*

- Led a team of 4+ engineers on early-stage AI initiatives, driving 0 to 1 product development from concept to implementation
- Defined technical specifications and high-level system architecture for AI-powered growth agents across sales and voice workflows
- Built and shipped LLM-driven systems to automate outreach and customer interactions, iterating quickly based on real-world usage

PokerGPT **January 2024 - February 2025**
Co-Founder & CTO *Toronto, ON, Canada*

- Co-founded and built PokerGPT, an AI-powered poker coaching platform using LLMs and solver-based systems
- Designed backend systems for real-time strategy evaluation and user interaction
- Grew to 1,000+ users in the first month and led product iteration through direct user feedback
- Contributed to acquisition of the product/team

Onova **November 2023 - September 2024**
Software Engineer *Toronto, ON, Canada*

- Developed and enhanced Earth, a comprehensive hackathon management platform, implementing authentication, submission, and admin workflows.
- Successfully managed two major hackathons, Capgemini x Google and Capgemini x Microsoft, attracting over 4000 participants, marking it as one of the largest internal corporate Gen AI hackathons.

SKILLS

Languages: Python, TypeScript, Go, C/C++, Java
Tools: Next.js, Django, Pytorch, Postgres, Git, OpenTelemetry
Infrastructure: AWS, Docker, Kubernetes, Linux/Unix
